

CENTUM VP FUNDAMENTALS (VPFD)

OBJECTIVE: This course is designed to give participants the fundamental knowledge on the hardware, operation and various functions of CENTUM VP system.

DURATION: 5 Days

PARTICIPANTS: For operators, plant operation specialists and Engineers who need to operate the CENTUM VP system.

PREREQUISITE: Participants should preferably have some basic knowledge on process measurement and control.

COURSE CURRICULUM :

Day-1	Training Registration
	DCS Evolution
	CENTUM VP System Overview
	CENTUM VP Hardware Overview - Field Control Station (FCS) Overview - Human Interface Station (HIS) Overview
	Operation of Standard Display Windows - Tuning Parameter Display - Tuning Parameters Description
	Practice Session
Day-2	Operation of Standard Display Windows - Control Group Display - Process Overview Display - Trend Recording Display
	Practice session
Day-3	Feedback Control Instruments Operation
	Sequence Control Instruments Operation
	Practical session

Day-4	Real time Graphic Display Features
	Process Alarm Management
	Annunciator Message Management
	Operator Guide Message Management
	Process Report
	Practical session

Day-5	Historical Report
	Dynamic Window Set
	Image File Utility
	System Status Display
	HIS Setup window
	Peripheral Device Connectivity
	Practical session
