

Assessment on Stardom and CIE

Course Duration: 5 Days

Maximum Marks: 15

From: 25/5/26

Marks Obtained:

To: 29/5/26

Faculty Name:

Participant's name: DINESH PICHAPPAN

Faculty Signature:

Answer all the questions. Tick the appropriate answers.

1. Difference between direct acting and reverse acting PID controller is

In direct acting if $PV < SV \rightarrow MV \downarrow$
In reverse acting if $PV < SV \rightarrow MV \uparrow$

2. The minimum scan time of Stardom POU is

a) 50ms b) 40 ms c) 100 ms d) 1sec

3. The three operation modes of a PID controllers are MAN AUT CAS

4. The codes for MAN and AUT mode in PID is 16#00800000 and 16#00400000

5. The tools used in STARDOM are Logic Designer and CI Server

6. The variables which corresponds to a Main program can be viewed in

a) mainT ☒ b) mainV c) main* d) none of these

7. In reverse acting PID block, what happens to MV when $PV < SV$.

MV increases

8. List any four differences between DCS and PLC

DCS	PLC
* Expensive	cheaper
* High number of I/Os	Less no. of I/Os
* Highly reliable	Not as reliable as DCS
*	

9. In Fast tools, Graphical windows can be viewed in the Operator Interface

10. SCADA is Supervisory Control And Data Acquisition
11. The tool which is used to create user group and users is Engineering Module
12. In Fast Tools, PV, SV and MV of a controller will be treated as tags
13. The tool which helps for graphics window creation Edit Module
14. The abbreviation for FAST is Flexible Advanced System Technique
15. Explain CASCADE loop

In a Cascade Loop a secondary controller is controlled by a primary controller
